Mother (mʌ·ðəɹ), *sb.*2 [Corresponds in meaning to MDu. *moeder*, *moer* (in mod.Du. *moer*), G. *mutter*, identical in form and gender with the equivalent of Mother *sb.*1

Comparison with the synonymous It., Sp. *madre* scum of liquids, F. *mère* (*de vinaigre*), OF. *mere* 'vendange pressée' (=sense 3 below), seems to show that this word, in Eng., Du., and Ger., is really an application of Mother *sb.*1 The transition of sense is difficult to explain; but most probably the scum or dregs of discilled waters and the like was regarded as being a portion of the 'mother' or original crude substance which had remained mixed with the refined product, from which in course of time it separated itself. (The term may possibly have belonged originally to the vocabulary of alchemy.) An explanation sometimes given, that 'mother of vinegar' was so called on account of its effect in promoting acetous fermentation, does not agree with the history of the use. It has been pointed out that Gr. γραῦς, old woman, is used in the sense 'scum, as of boiled milk', but the coincidence is prob. accidental.

Most etymologists have regarded the word (with its Du. and Ger. equivalents) as altered by popular etymology from Du. *modder* masc., mud, mire (for which Middle Du. has a rare variant *moeder*, occurring chiefly in derivatives) = LG. *modder*, *moder* (whence mod.G. *moder*), HG. dial. *motter* masc. (for which a variant *mutter* occurs). This notion goes back to Kilian's (Du. or Flemish) dictionary of 1598, which contains the two following entries: (1) '*Modder*, *moder*, *moyer*, *more*, *moer*, limus, cœnum mollius, lutum, volutabrum; Ang. *mire*, *mudde*'; and (2) '*Modder*, *moeyer*, *moeder*, *grondsoppe*, fæx, fæces, crassamen, crassamentum; Ang. *mother*'. But there appears to be no evidence that the form *modder* was ever used for 'mother' or 'scum', nor is that sense recorded for Ger. dial. *motter*.]

Motley (mɒ·tli), *a.* (*adv.*), *sb.* Forms: 4 motteley, 4–5 mottelay, 4, 6–8 motly, 5 motle(e, motele, motleye, 6–7 moatl(e)y, (7 mothly), 7–8 motely, 5– motley. [Of obscure origin.

The early forms (with which cf. those of Meoley) suggest adoption of an AF. **motelé*, which may possibly have been formed on the native Eng. Mote *sb.*1, speck, spot; cf. *speckled*, with which in some early examples *motley* seems nearly synonymous. Formally the word might be derived from OF. *motel*, early mod.F. *motteau* little clod, also 'clot of congealed moisture' (Cotgr.), dim. of *mote*, *motte* clod, but this does not seem quite satisfactory with regard to sense. Connexion with early mod.F. *mattelé* 'clotted, knottie, curdled, or curd-like' (Cotgr.) is improbable on grounds both of form and meaning.]

Mound (mound), *sb.*[3] Also 6 mownde, 7 mounde. [Of obscure origin; the related MOUND *v.* occurs earlier in our quots., and may possibly be the source of the sb.

The sb. has commonly been supposed to represent the OE. *mund* (cf. MOUND *sb.*[2]); but that word means not 'defence', but 'guardianship, tutelage' (of persons). The OE. *mundbeorgas* (rendering L. *montes* in Ps. cxxiv. 3), which has been appealed to to show that *mund* might have the sense of material defence or protection, is prob. a mistake for a tautological **muntbeorgas.*

Sense 2 appears to have arisen from the modification of the original sense 'fence' by association with MOUNT *sb.*[1]; the same influence afterwards produced the now prevailing sense 'tumulus', which first occurs in the 18th c.]

1. A hedge or other fence bounding a field or garden. Now only *dial.*

Now current only in Oxfordshire and the counties near its border. The early examples of the sb. and the related verb are all from writers belonging to these localities.

Moxa (mɒ·ksă). [a. Jap. *mokusa* (phonetically mɒ·ksa), contracted from *moe kusa* burning herb.]

1. The downy covering of the dried leaves of *Artemisia moxa*; esp. as prepared in the form of a cone or cylinder for burning on the skin as a counter-irritant for gout, etc. Also, the plant itself.

2. Any substance used like moxa for burning on the skin.

[Moy, *sb.*[3] An imaginary name of a coin, evolved by 'Ancient Pistol' from a misunderstanding of the Fr. *moy* (me) in his prisoner's speech.

It seems unnecessary to suppose that there is an allusion to any genuine name of a coin. MOIDORE, if the word existed so early, may have furnished Shaks. with the suggestion; but our oldest instance is of the 18th c. That the Pg. *moeda* was familiar to Shaks. is unlikely. Still less plausible is Douce's suggestion, that the word is the F. *muid* (MOY *sb.*[1]).

Mr. [Orig. an abbreviation of Master.]

†1. In the 16th and 17th c. used for Master in any of the applications of the word. *Obs.*

2. As a prefixed title. Now pronounced (mi·stəɹ), or with entire absence of stress (mistəɹ, m'stəɹ). The want of a plural form is supplied by *Messrs.*, Messieurs 2.

Until the latter half of the 17th c. the title was often written in the full form *master*; but there is reason for believing that from the 16th c. it was, at least in rapid or careless speech, treated proclitically, with consequent alteration of the vowel of the first syllable. (See Mister *sb.*[2] 1, quot. 1551.) Eventually the word came to have the weakened pronunciation whenever it was used as a prefixed title, and it became customary to employ the abbreviated spelling always for this use, and for this only. Hence at the beginning of the 18th c. *master* and *Mr.* were already regarded as distinct words. Cf. Mister *sb.*[2], which is merely an occasional (chiefly jocular) rendering of the pronunciation of the word of which 'Mr.' is the accepted spelling.

The early history of the application of *Mr.* is identical with that of the use of its fuller form: see Master *sb.* 21. From the 17th c. it has been the customary ceremonious prefix to the name of any man below the rank of knight and above some humble but undefined level of social status, except where usage requires the substitution of some honorific title, such, for instance, as those denoting military and naval rank. As with other titles of courtesy, the inferior limit for its application has been continually lowered; at the present day any man however low in station would be styled 'Mr.' on certain occasions, e. g. in the address of a letter. Modern custom forbids the use of the prefix when *Esquire* is appended to the name, and it is now omitted after 'The Hon.' and 'The Rev.' (though some still write 'the Rev. Mr. A.' when the Christian name happens to be unknown); but in other than ceremonious use 'Mr.' is substituted for these titles.

The use of *Mr.* before a *prefixed* title of office is nearly obsolete. The Judges of the Supreme Court are still styled 'Mr. Justice A.'; the designations 'Mr. Baron A.', 'Mr. Serjeant B.', belonged to dignities now abolished. In municipal use we still occasionally read of 'Mr. Alderman A.', 'Mr. Deputy B.', 'Mr. Councillor C.'.

Before an official title *not* followed by the name, the prefix *Mr.* is still common, as in 'Mr. Chairman', 'Mr. Editor', 'Mr. President', 'Mr. Mayor'. These are now used only vocatively; 'Mr. Speaker' is used also in the 3rd person.

c. Prefixed to a foreign name. Now *rare*, the usual practice being to employ *Monsieur* (*M.*, *Herr*, *Signor*, or the like.

In French *Mr.* is used (beside *M.*) as an abbreviation of *Monsieur*. It may possibly be so intended in the Shaks. quot. below, where modern editors print *Monsieur*.

2. As a prefixed title of courtesy. Now pronounced (mi·sis, mi·siz).

In the latter half of the 17th c. there was a general tendency to confine the use of written abbreviations to words of inferior syntactical importance, such as prefixed titles. The form *Mrs.* for *mistress* therefore fell into disuse exc. when prefixed to a name; and in this position the writing of the full form gradually became unusual. The contracted pronunciation, which in other applications of the word has never been more than a vulgarism (see Missis), became, for the prefixed title, first a permitted colloquial licence, and ultimately the only allowable pronunciation. When this stage was reached, *Mrs.* (with the contracted pronunciation) became a distinct word from *mistress*. As to the chronology of these changes evidence is wanting; but it may be noted that Walker 1828 says that *mistress* as a title of civility is pronounced *missis*, and that 'to pronounce the word as it is written would, in these cases, appear quaint and pedantick'.

a. Prefixed to the surname of a married woman (sometimes with her Christian name or that of her husband intervening).

Originally distinctive of gentlewomen, the use of the prefix has gradually extended downwards; at the present time, every married woman who has no superior title is styled 'Mrs.' even though her husband is of so humble a position as not ordinarily to be referred to as 'Mr.'. In British use the insertion of a woman's Christian name after *Mrs.* (as 'Mrs. Mary Smith') is rare exc. in legal documents, cheques, or the like, the normal practice when distinction is needed being to insert the husband's name (as 'Mrs. John Smith'). In the U.S. both these modes of designation are in general use.

†b. In the 17th and 18th c. prefixed to the name of an unmarried lady or girl; equivalent to the mod. use of MISS *sb.*² *Obs.*

Late in the 18th c. the title (usually, but not always, followed by the Christian name) was applied occasionally to elderly maiden ladies (as 'Mrs. Elizabeth Carter', 'Mrs. Hannah More') after this use had ceased to be general.

The L. *mūlus* was adopted at an early period into most of the Teut. langs.: MLG., OHG. (MHG.) *mûl*, MDu. *muul* (mod.Du. *muil*, early mod.G. *maul*), ON. *múli* (Sw. *mula*, Da. *mule*). A 14th c. survival of the OE. *mûl* may perh. be found in the isolated form *moul* in the Göttingen MS. of the *Cursor Mundi*. The obsolete forms *muil*, *moul*, represent an Eng. development of OF. *ü*, which is found also in other words, as *recoil*, *ois* (=USE).]

1. The offspring of a he-ass and a mare. Also popularly applied to the offspring of a she-ass and a stallion (technically called a HINNY).

The mule combines the strength of the horse with the endurance and surefootedness of the ass, and is extensively bred for certain employments for which it is more suited than either; it is ordinarily incapable of procreation. With no good grounds, the mule is a proverbial type of obstinacy.

Multepli, Multer: see MULTIPLY, MULTURE.

Multi- (mʌ·lti), occas. before a vowel mult- (e.g. *multangular, multarticular, multocular*), combining form of L. *multus* much, many. The compounds having this prefix in Latin belong for the most part to non-classical times: they are chiefly of parasynthetic formation, in which *multi-* = 'many', as *multangulus* many-angled, *multicaulis* many-stalked, *multigenerus* of many kinds, but a certain number of objective or adverbial compounds also existed, in which *multi-* = 'much', as *multibibus* much-drinking, *multicupidus* desiring much, *multiscius* knowing much.

In English the compounds of *multi-* were originally either direct adaptations from Latin compounds or were modelled upon them, but in the 19th c. the prefix came into frequent general use with ppl. adjs. and sbs. (Cf. POLY-.) The earliest English borrowings from Latin were *multifary* (Lydgate), *multifarious* (Nashe, 1593), *multiformity* (Puttenham, 1589); they did not become numerous till the middle of the 17th c. The more important compounds (being chiefly those which have a continuous history from the 17th c. onwards) are entered as Main words; the present article comprises a typical selection of modern scientific terms and of compounds of a general character.

The change of original *ð* into *d* (contrary to the general tendency to change *d* into *ð* before syllabic *r*) was prob. due to the influence of the AF. *murdre, moerdre* and the Law Latin *murdrum*.]

1. The most heinous kind of criminal homicide; also, an instance of this. In *English* (also *Sc.* and *U. S.*) *Law*, defined as the unlawful killing of a human being with malice aforethought; often more explicitly *wilful murder*.

In OE. the word could be applied to any homicide that was strongly reprobated (it had also the senses 'great wickedness', 'deadly injury', 'torment'). More strictly, however, it denoted *secret* murder, which in Germanic antiquity was alone regarded as (in the modern sense) a crime, open homicide being considered a private wrong calling for blood-revenge or compensation. Even under Edward I, Britton explains the AF. *murdre* only as felonious homicide of which both the perpetrator and the victim are unidentified. The 'malice aforethought' which enters into the legal definition of murder, does not (as now interpreted) admit of any summary definition. A person may even be guilty of 'wilful murder' without intending the death of the victim, as when death results from an unlawful act which the doer knew to be likely to cause the death of some one, or from injuries inflicted to facilitate the commission of certain offences. It is essential to 'murder' that the perpetrator be of sound mind, and (in England, though not in Scotland) that death should ensue within a year and a day after the act presumed to have caused it. In British law no degrees of guilt are recognized in murder; in the U. S. the law distinguishes 'murder in the first degree' (where there are no mitigating circumstances) and 'murder in the second degree'.

1. *Mythology.* (Now usually with capital.) One of nine sister-goddesses, the offspring of Zeus and Mnemosyne (Memory), regarded as the inspirers of learning and the arts, esp. of poetry and music.

In Greek antiquity there were other accounts as to the number of the Muses and of their parentage. The names of the nine Muses appear first in Hesiod, who says that Calliope is the chief of them. Later mythologists assigned to each of the Muses a particular class of functions, which, however, are less definitely limited than they appear in modern allusive use, where Clio is the Muse of history, Thalia of comedy, Melpomene of tragedy, Euterpe of music, and Terpsichore of dancing. The other names, Erato, Polyhymnia, Urania, and Calliope, are rarely mentioned in modern literature, as they have no well-known association with any particular branch of art or knowledge. Urania (lit. 'the heavenly'; in formal lists the Muse of astronomy) is invoked by Milton (*P. L.* VII.), who explains that he means not the fabled goddess of mythology, but the true celestial source of inspiration.

Although a 'museum' may include a library (as does the British Museum) or a picture gallery, the word is not in ordinary Eng. use applied to an institution of which either of these is the sole or the most prominent feature. On the continent the corresponding word is often used with reference to a collection of works of painting or sculpture, and when so used is rendered 'museum' in English.

1. That one of the fine arts which is concerned with the combination of sonnds with a view to beauty of form and the expression of emotion; also, the science of the laws or principles (of melody, harmony, rhythm, etc.) by which this art is regulated.

Considered as an art, music has two distinct branches, the art of the composer and that of the executant. The word is often used with special reference to the executive branch, and to instrumental execution rather than vocal; thus, the designation of 'a teacher of music' is usually apprehended to mean one who teaches the art of playing on some instrument.

1. A hand-gun of the kind with which infantry soldiers are armed.

Originally applied to the matchlock, and in the 18th c. still sometimes distinguished from the 'firelock' or 'fusee'. (From early examples it appears that arrows as well as bullets were discharged from muskets.) Subsequently it became the general name for the infantry gun, whatever its construction. This use still survives, but as the modern gun is commonly (and in the Army Regulations) called by the specific term *rifle*, there is a tendency to restrict *musket* to the obsolete forms of the weapon.

II. Used as a pres. tense, and hence (under certain conditions) as a past tense corresponding to this.

The use as a present arose from the practice of employing the past subj. as a moderate, cautious, or polite substitute for the present indicative. The modern use as a past tense coincides with sense 2, but app. does not historically descend from it, exc. that the preterital use in *must needs* (see NEED, NEEDS *advs.*) may perhaps represent a continuous survival.

3. Equivalent to the older MOTE *v.* 2, expressing necessity: Am (is, are) obliged or required to; have (has) to; it is necessary that (I, you, he, it, etc.) should. In the second person, *must* now chiefly expresses a command or an insistent request or counsel; in the third person it tends to be restricted to the expression of a necessity which is either imposed by the will of the speaker, or relative to some specified end, or enunciated as a general proposition.

a 1300 *Cursor M.* 5018 Vee most [*Gött.* must] yow hast on your fare. *a* 1300 *K. ESHER in *Law Times Rep.* LXVII. 211/1 The sewage matter..goes along a sewer which must carry it into the stream, unless it is intercepted on the way.

c. In expressions like *I must say* = I cannot help saying. Also in explanatory clauses, as *you must know* or *understand* = you ought to be informed, I would have you know.

d. As a past tense: Was obliged, had to; it was necessary that (I, he, it, etc.) should.

In modern use confined to instances of oblique narration, and of the virtual oblique narration in which the speaker has in his mind what might have been said or thought at the time. To say 'I must go to London yesterday' would now be a ludicrous blunder.

Albanian *mustakes*, Rumanian *mustate* moustache), a derivative of Gr. *μυστακ-*, *μύσταξ* masc. (also *βύσταξ*) moustache, a Doric word, commonly believed (notwithstanding the difference both in meaning and in gender) to be a dialectal variant of *μάσταξ* fem., mouth, jaws.

In the 16–17th c. the word appears in a multitude of corrupt forms due to imperfect apprehension or recollection of the sound. Some of them suggest a pseudo-etymological association with Sp. *muchacho* boy.

In the sing. the word is almost or entirely obsolete, being superseded by MOUSTACHE; but the plural *mustachios* has considerable currency, sometimes occurring in books that have *moustache* in the singular. With regard to the pronunciation of the first syllable cf. MOUSTACHE.]
